HOUGHTON COLLEGE, Houghton, N.Y.

The Willard J. Houghton Library

The Christian student must be acquainted with a wide span of literature, including much of the worthy and some of the unworthy.

The Christian student recognizes that an enemy has sown tares in the wheat of God's truth.

Inclusion of this book in the library does not imply endorsement by Houghton College. The student must prove all things, holding fast the good; the teacher must rightly divide and interpret all in accordance with Holy Scripture.

Parallel RL circuits (*Motion picture*) Animated Electronics Films, 1968.

4 min. si. color. super 8 mm. (Electronic circuit theory series)
Loop film mounted in cartridge.
With narrative guide and animation model.
Summary: Uses animation to show three currents in the parallel RL circuit. Points out that when the values of inductance and resistance are varied incrementally it causes phase and amplitude changes in the line current and amplitude changes in the branch currents. Also shows in animation meter movements and appropriate waveforms. With subtitles.

4 min. si. color. super 8 mm. (Electronic circuit theory series)
Loop film mounted in cartridge.
With narrative guide and animation model.
Summary: Depicts both the inductive and capacitive branches in a parallel circuit as having substantial resistance to current flow. Shows what happens when an additional resistance is added in parallel with the two branches, so that three paths for current flow become available between the terminals of the generator.

Summary: A teacher uses a zinc plate, an electroscope, and ultraviolet light to demonstrate the photoelectric effect and how it can readily be shown to a class. He then emphasizes the many pitfalls in gathering and interpreting data and demonstrates how quantitative data can be obtained and analyzed to yield a value for Planck's constant.
